

ATMOSPHER

SERIES

PROGRAMMABLE CONTROLLER

Unique and versatile programmable controller, offers optimal management of your water treatment systems. Allows you to know your systems' operational status and general history, wherever you are.

ATMOSPHER^e SERIES

TECHNICAL DATA

GOLD CONTROLLER

Non-corrosive metal enclosure

Microcontroller

Controls up to 2 systems

Communication: Web-base programming via WIFI*
USB programming software

Interface: 4-line OLED display

Compatible flowmeter: Frequency Inputs
(NPN High & Low)

Alarms and cleaning cycle history*

Alarm contact

*With Wifi option

PLATINUM CONTROLLER

NEMA 4 enclosure

Programmable Logic Controller (PLC)

Controls up to 3 systems

Communication: Ethernet, BACnet, Modbus

Interface: Color touch screen

Compatible flowmeter: Frequency Inputs
(NPN/PNP High & Low)

On-screen alarms and cleaning cycle history

Cleaning and general alarm contact confirmation

- Programmable based on water quality, schedule, countdown, volume, pressure differential, or manual mode;
- Instant flowrate and daily volumes data;
- Controls several systems simultaneously;
- Color HMI touch-screen or OLED display.
